

Our dairy experts unanimously agree:

Milk foam that finally tastes like milk.

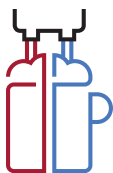

New. WMF Dynamic Milk.

Available for the
WMF 1500 S and
WMF 5000 S series

New. WMF Dynamic Milk.

Milk foam that finally tastes like milk.

**DYNAMIC
MILK**

When it comes down to whipping up milk foam sensations, no wish is left unfulfilled with our new milk system. Catering for every recipe, WMF Dynamic Milk offers four different consistencies for hot milk foam, up to three alternative levels for cold milk foam, as well as hot and cold milk options. Even during beverage preparation, the milk foam consistency can be adjusted according to preference. The result: milk coffee creations that set new benchmarks in terms of variety, appearance and taste.

Cold milk foam

Three refreshing options for coffee specialities made with cold milk foam e.g. milkshakes and iced lattes.

Fluid

Creamy

Compact

Hot milk foam

Four different consistencies for hot foam favourites, including caffè latte, cappuccino and latte macchiato.

Fluid

Creamy

Compact

Fluffy

Clean in Place

The foam preparation, controlled by the machine itself, is dispensed via a separate foaming chamber – which therefore eliminates time-consuming cleaning. The combi spout doesn't need to be removed and completely disassembled in order to meet HACCP-compliant hygiene standards. The efficient, new cleaning process, "Clean in Place", is built in all WMF coffee machines equipped with WMF Dynamic Milk.
